# TECHNOLOGIES

## DOUBLE WI-FI SUPPLIED AS STANDARD

2 Wi-fi modules have been designed for products equipped with Maestro technology, allowing a priority connection to your smartphone and / or handheld remote control and a second connection to the home internet network (via router).

## EXCLUDABLE VENTILATION

The No air function in ventilated heaters, allows to totally exclude or to minimally reduce the forced ventilation of the heater, thus ensuring the utmost silence and all the pleasure of heat spread out in the environment by natural convection.

## NATURAL FLAME

Latest-generation pellet products feature a large flame with a more natural movement and truly beautiful to look at.

## IGNITION IN 3 MINUTES

Product equipped with ceramic spark plug ensuring ignition times reduced by 40%.

## WEEKLY ASH EMPTYING

The high capacity of the ash drawer allows the stove to be used for a week without emptying (average power consumption, 8 hours/day operation).

## STRUCTURE COMPLETELY SEALED

Products built with Oyster technology do not consume oxygen by taking all the air from the environment outside so therefore can be placed inside every home properly insulated and within passive houses.

## BRUSHLESS

Thanks to advanced technology, the new brushless gear motor guarantees high sound comfort (almost no noise) and substantial energy savings (consumption 90% lower compared to traditional motors). Used both in the pellet loading system and in the automatic brazier cleaning system (Hydro Matic and Comfort Air Matic systems).

## MATIC

**1** / Automatic self-cleaning brazier with comb mechanism for a more effective cleaning

**2** / Dedicated brushless engine

**3** / Utmost combustion efficiency thanks to the electronics that defines the mechanical cleaning in regular cycles or in case of blockages

**4** / Availability both on water and high power air versions (14 kW)

**5** / Ash pan allowing the emptying on a weekly basis or beyond

## MANY SOLUTIONS TO TAKE ADVANTAGE OF ALL THE SPACE AVAILABLE IN YOUR HOME

### CONFINED SPACES

Thanks to a very limited depth, these products are particularly suitable in small rooms or hallways.

### USE OF OLD FIREBOXES

These products are designed to be able to use old fireboxes that do not work and / or do not heat, thanks to a limited height (stoves) and the possibility of being incorporated (chimneys).

### USE OF EXISTING FLUES

Thanks to the presence of an upper flue outlet, these stoves can take advantage of the existing flues, thereby optimising the living space and reducing installation costs.

### CORNER SOLUTIONS

Stoves designed to take advantage of the corners in a home, which are generally used very little.

### WALL-MOUNTED INSTALLATIONS

This is the classic solution: installed in front of a wall (stove) or inserted into the wall (chimney), these products blend in perfectly with the architecture of the room.

### SEPARATION OF ROOM

Products that have two or three exposed sides, which allow for a view of the fire from separate rooms, thereby optimising the living space.

## ALL OPERATING SYSTEMS

### **1 PANEL**

A simplified solution, with easy and intuitive functions, suited to those preferring a truly simple solution.

### **2 REMOTE CONTROL**

This is a remote control with few buttons and lots of functions. In addition to the normal daily/weekly programming functions, you can program different temperatures in different time slots during the day. Since the temperature can be read exactly in the spot where it is left (thermostat function), the comfort level is assured.

### **3 SMARTPHONE AND TABLET**

In addition to the traditional panel or remote control, through a dedicated application (App), it is possible to manage and programme the stove from your smartphone or tablet, inside or outside of the house: for maximum comfort (requires an accessory kit; compatible with the systems Android / iOS). With all models, it is nevertheless possible to manage the main functions via text message (this requires an accessory kit).

## COMBUSTION CONTROL SYSTEMS

### **THE FIRST OPERATING SYSTEM FOR A STOVE, NOW EVEN MORE ADVANCED**

#### **THE MOST ADVANCED HEAT EXPERIENCE**

Maestro technology allows the heater to express its utmost potential with even an easier and more intuitive use. A real integrated micro-computer dialogues with your smartphone and further improve the performances of the heater that continues to perfectly work even in non-ideal conditions.

#### **1 / WI-FI TEMPERATURE PROBE**

#### **2 / REMOTE DIAGNOSTIC**

#### **3 / EASY AND COMPLETE APP**

#### **4 / DOUBLE WI-FI INCLUDED**

#### **5 / HANDHELD REMOTE CONTROL**

#### **6 / DIGITAL PANEL**

#### **7 / PERFECT FLAME**

#### **THE BEST COMBUSTION**

Thanks to the extremely reliable and accurate sensor inside the oven, the oxidising air is constantly adjusted according to the quantity of pellets present in the brazier, thus ensuring effective and efficient combustion, which translates into lower consumption, lower emissions and much less frequent cleaning.

#### **THE TYPE OF PELLET ISN'T A PROBLEM ANYMORE**

Because the stoves equipped with the Active system adapt automatically to any pellet length and with the diameter of 6-8 mm.

#### **INSTALLATION EASINESS**

The combustion is effective and efficient regardless of the type of chimney connection which with conventional systems can be a problem during installation.

#### **NEW USER INTERFACES**

Thanks to Active+, it is possible to control and communicate with the stove from your smartphone or tablet.

#### **IMPROVED SILENCE**

As the new pellet stoves that are equipped with Active+ are able to manage a more evolved gear motor (in continuous operation), they are even quieter.

TECHNOLOGIES

core

# core

Core is the new firebox with patented technology that has shaken up the pellet combustion world: a wide natural flame similar to wood-fired products, one of the category's lowest emission levels, and pleasing to the eye either on or off. Designed by the very flame, the firebox no longer has all the technical parts exposed. The combustion of the gases produced by pellets is harnessed to slow down the flame and provide a unique view of the fire.

Clean glazing for long periods of time thanks to the extremely low level of emissions

Firebox with AISI 304 stainless steel core and cast iron shell

Gasification and post-combustion in several points of the combustion chamber

With its self-cleaning brazier, no brazier cleaning is required

## A NATURAL FLAME AT ALL POWER LEVELS

We designed a loading system to eliminate the noise of fuel feeding, we were aiming for the quietest pellet product ever made by us.

We cleared the firebox from all the exposed technical elements to leave an obstructed, harmonious view of the fire. For the first time, we allowed the firebox to be designed by the flame.

## SILENCE IS A LUXURY, TREAT YOURSELF

Operated by a brushless motor, pellets feed combustion without touching the metal walls, which makes the operation of the stove even quieter.

The Comfort and Overnight modes make operation even quieter.

Thanks to its very low smoke extraction speed, ventilation is almost imperceptible.

## ONE OF THE CATEGORY'S LOWEST EMISSION LEVELS

Performance is entirely met at all operating power levels.

Core's emission levels fall widely within the strictest European limits.

# TECHNOLOGIES

## COMBUSTION CONTROL SYSTEMS

### DUCTED AIR

#### DIFFUSER POSITIONABLE UP TO 8 METRES, FREELY

Comfort Air® can effectively carry the warm air (80°C) into other rooms up to a maximum distance of 8 meters. Unlike traditional systems in which the jets must be positioned at the top, Comfort Air® allows the jets to be freely positioned.

#### EASE OF INSTALLATION AND MAINTENANCE

With a significantly smaller diameter than other models on the market (60 mm and 100 mm), Comfort Air® ensures easier installation of the funnel into the wall, consequently limiting the necessary masonry works, which often take time and are very invasive, and making the fans easier to maintain.

#### TOTAL AIR DISTRIBUTION CONTROL

Fitting an electronic control unit, Comfort Air® can control up to two air flows (in closed fireplaces) to distribute heat and convey warm air into various rooms.

#### THE FIRST DESIGN DIFFUSERS

Comfort Air® is fitted with air distribution outlets that, for the first time, offer a true design piece. These outlets are ideal for integration into any furnishing, with their minimalist design and exclusive light and aromatherapy function that makes them unique on the market.

### FORCED VENTILATION

#### A TRULY COMPLETE RANGE

To satisfy all requirements, in terms of power and operative functions.

### CONVECTION VERSIONS

#### NATURAL HEAT

Unlike a normal pellet stoves with forced ventilation, here the heat is diffused in a natural way via convection. Every technical detail has been designed to exchange all the heat in the room.

### WATER

#### HOT RADIATORS FAST

Thanks to low thermal inertia, Hydro pellet stoves, once on, are able to heat your domestic radiators in just a few minutes (for some models there are also kits for connection to the hot water system).

#### MAXIMUM HEAT EXCHANGE

About 90% of power rendered overall by the stove is transferred to the water guaranteeing excellent performance who those choosing radiators for domestic heating.

### OVERNIGHT

#### HEAT AND BURNING EMBERS FOR UP TO 12 HOURS AFTER THE LAST WOOD FILLING OPERATION

In stoves featuring Overnight technology, a mass of refractory material stores the heat produced by the fire and releases it over time. With 4 kg of wood (with the stove already lit), the temperature released by the stove is still 40° after 12 hours.

#### ALL THE PLEASURE OF RADIANT HEAT

With Overnight technology, the heat stored by the mass of refractory material in the stove is released uniformly over time throughout the room.

## NEW GROOVE Comfort Air Matic 8

kW 7,8	91,5/93%	Ø cm 8	kg 148	cm 52 x 54,5 x 118,4

Model: GROOVE COMFORT AIR MATIC 8 M1

Conto Termico 2.0

En cours de certification.

Pellet stove with no front vents, made of natural or serpentine stone (in the version with full cladding or front cladding only), Black, White or Bronze coloured steel.

New Core firebox featuring a wide natural flame similar to wood-fired products, one of the category's lowest emission levels, and pleasing to the eye even when it is off.

Product equipped with ceramic glow plug for 40% faster ignition times. You can choose whether to have a remote control (optional), a control panel (optional) or to use your smartphone. Thanks to the new app with 5 preset operating settings, fuel consumption is optimised and improves the comfort of use, making it possible to achieve extremely noiseless operation.

### WALL WALL ANGLE

kW 8,1	90,9/92,6%	Ø cm 8	kg 132/136/ 129	cm 52 x 62,6 x 125,2	

Model: WALL AIR 8 M1					Conto Termico 2.0	

Pellet stove without front outlets made of black steel with base available in different finishes (Black, Stone, Terrazzo, Beton grey, Wood). The unique design of the structure that is placed against the wall hides the technical connection elements of the stove, thereby giving it an ultra-clean look.

A round version is also available for corner applications (WALL ANGLE). Possibility to totally exclude the ventilation. Product equipped with ceramic glow plug ensuring ignition times reduced by 40%. Rear or top outlet. You can choose whether to have a handheld remote control (optional), a control panel (optional) or to use your smartphone.

### PRODUCT TYPE:

Minimalist design and fine details. In addition to the natural property of the stone to store and release heat slowly, this stove has forced ventilation, therefore the room can be heated up quickly. A product with excludable ventilation, weekly ash emptying and reduced ignition times. Intelligent Maestro electronics always ensure optimised combustion.

### MATERIALS:

Glass: front door  
Cast iron: brazier, combustion chamber  
Pietra Serpentino: cladding

### NEW FLOW Comfort Air 10

	POWER		90,4/92,6%		Ø cm 8		kg 130		Ø cm 54 x 123
kW 10									

maestro

Pellet stove featuring a steel and ceramic cladding with a smooth (Plain White, Plain Black) or grooved finish (Line White, Line Bordeaux). Ductable product (2 motors, 1 ducting + front outlet), equipped with ceramic glow plug assuring 40% faster ignition times. You can choose whether to have a remote control (optional), a control panel (optional) or to use your smartphone. Thanks to the new app with 5 preset operating settings, fuel consumption is optimised and improves the comfort of use, making it possible to achieve extremely noiseless operation.

### PRODUCT TYPE:

New hydro version, equipped with self-cleaning brazier, with weekly ash emptying and simplified special maintenance. Front ventilation is ensured also in the 16kW version. Significant performance levels (95% efficiency at reduced power and CO levels below 70 mg/Nm<sup>3</sup>). Product equipped with ceramic spark plug ensuring ignition times reduced by 40%. The firebox, featuring curved lines, is larger and deeper allowing a better view of the fire.

### MATERIALS:

### PRODUCT TYPE:

New version now available with Maestro technology. Classic-style pellet stove, with cladding and firebox entirely made of cast iron. The sliding opening of the pellet tank makes loading operations extremely easy. Thanks to its low height and the presence of a top smoke outlet, this product is the perfect solution for optimising the living space. You can choose whether to have a handheld remote control (optional), a control panel (optional) or to use your smartphone.

### MATERIALS:

Steel: structure

Cast iron: cladding, brazier, combustion chamber, door

## GENERAL SALES CONDITIONS

- 1 The prices are to be considered ex-works.
- 2 The goods are shipped at the purchasers risk and hazard, even if shipped free at destination.
- 3 The company reserves the right to make modifications to its models which it feels are necessary for functional or aesthetic reasons, even without advance notice.
- 4 Differences in colours, shades and grains must be accepted in that marble and stone, being natural materials, may undergo substantial variations even within the same specimen of material. This non-continuity in shades and grains is not to be considered a defect; even the gluing of marble and putty are to be considered normal working and are universally accepted. In claddings that call for solid wood beams, any fissures are not to be considered as manufacturing defects, but as normal settling of the wood. Ceramics may have indentations, speckling and shading. This particular characteristic of the material does not affect quality and is not to be considered a defect.
- 5 Any claims concerning stains or breakage will be accepted only if they are detected upon receipt and duly noted on the shipping documents.
- 6 Reasons different from those set forth in point 5 will be considered only if they are communicated in writing no later than eight days from receipt of goods.
- 7 Any material which is returned, only if in good condition and with the prior consent of MCZ GROUP S.p.A., will be accredited at 75% of the invoiced value.
- 8 The photographs of the claddings in the catalogue and the colours of the marble are purely indicative; claddings are provided up to the beam.
- 9 Modifications to standard claddings must be accepted by the company after a cost estimate and will be possible only if a drawing is presented.
- 10 Payment must be made to our location by the agreed due date. Failure to meet said payments will cause accrued interest to be charged at the current rate, plus expenses. Material, including that on display, shall remain our property until full payment is made.
- 11 In case of controversies, the Court of Pordenone shall have jurisdiction.
- 12 The prices shown in the price list do not include VAT.
- 13 Effective 1/8/2020.
